Software engineering student (last year) with hands-on experience developing production-oriented web applications, AI-powered features, and distributed systems. Currently completing a software development internship and researching adaptive Retrieval-Augmented Generation (RAG) for scientific question answering. Comfortable collaborating across the stack, from responsive interfaces to Python services and cloud fundamentals.

EXPERIENCE

Software Development Intern — Wellwork Solutions | *Remote / Canada* | *2026–Present*

- Developed a responsive, multi-page corporate wellness website using Next.js, TypeScript and Tailwind CSS, with reusable UI components and mobile navigation.
- Implemented service, pricing, insights/blog, about and contact experiences; prototyped an AI chatbot interface for the website.
- Contributed to early product scoping and technical discussions for scheduling and operational workflow software targeting service businesses.

Customer Service & Retail — Seasonal Roles | *Spain* | *2021–2025*

- Managed customer requests, cash handling and closing procedures in fast-paced, multilingual teams.

SELECTED PROJECTS

Adaptive RAG for Scientific Question Answering — Bachelor's Thesis (In Progress) | *Python, FastAPI, QASPER, NLP* | *2026–2027*

- Investigating adaptive retrieval strategies for scientific QA, comparing fixed RAG with question-dependent retrieval effort and computational cost.
- Analyzing QASPER question types, evidence requirements and answer characteristics to inform retrieval decisions and experimental evaluation.
- Built an initial FastAPI document-processing service with PDF text extraction, Docker setup and automated tests.

HSG Tutoring — Full-Stack Web Project | *Next.js, TypeScript, Tailwind CSS* | *2026*

- Built and deployed a responsive tutoring website with service, pricing, contact and informational pages, plus an AI study-plan feature.
- Integrated an external appointment-booking flow and developed contact and study-plan API endpoints.

EV Charging Network — Distributed Systems | *Python, Apache Kafka, Flask, REST, TCP sockets* | *2026*

- Developed a multi-service charging-network simulation with central coordination, charging-point processes, driver requests and a Flask dashboard.
- Used Kafka messaging, TCP communication and heartbeat-based monitoring to coordinate services and detect failures.

Gestionate!!! — AI-Assisted Android App | *Kotlin, Jetpack Compose, ML Kit OCR, Gemini, Room* | *2026*

- Collaborated on an Android app that extracts document text, uses AI to identify actionable information and generates reminders.

EDUCATION & CERTIFICATIONS

BSc Computer Science (Software Engineering) — University of Alicante | *Expected 2027*

AWS Certified Cloud Practitioner • AWS Summit Madrid 2026 (Bedrock, AI agents and workshops)

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, Kotlin, C#, C/C++
Frameworks & Web: Next.js, React, Tailwind CSS, FastAPI, Flask, Spring Boot, .NET, Jetpack Compose, REST APIs
AI & Data: RAG, LLM integration, document processing, OCR, QASPER, SQL, SQLite, PostgreSQL
Cloud & Systems: AWS fundamentals, EC2, Docker, Apache Kafka, TCP/IP, Linux, Git, GitHub

LANGUAGES & VOLUNTEERING

English and Punjabi (native); Spanish (C1); Hindi (fluent); German (basic). Spanish-language support volunteer, ASILA NGO (2019).
